INFRASTRUCTURE FUTURES CONVERGENCE WORKING GROUP

May 2023 - May 2024

Infrastructure Futures Convergence Working Group (CWG) goals center around building data resources for Arctic infrastructure research, connecting stakeholders in sustainable Arctic infrastructure planning and design, and helping to meet community needs through best practices in education and investment in infrastructure.

RECENT WORKING GROUP ACTIVITIES:

- “Envisioning the Future of Arctic Infrastructure Research” panel convened during March 2024 NNA-CO Annual Meeting to share progress and good practices of studying Arctic infrastructures, transformations of infrastructure due to climate and social change, the impact of infrastructure on local communities and Indigenous Peoples, and opportunities for planning and envisioning just and equitable infrastructure futures.
- Hosted networking lunch after NNA-CO panel in collaboration with Rapid Arctic Transitions due to Infrastructure and Climate (RATIC) Permafrost & Infrastructure Symposium workshop participants.
- Connecting Arctic Priorities (CAP) Portal database analysis and outreach campaign planning.

UPCOMING ACTIVITIES & OPPORTUNITIES

- Our Research Coordination Network (RCN) proposal on “Co-creating Research for Just Arctic Future Infrastructure Transformations, Resilience, and Adaptation” (**CRAFT**) is under consideration by NSF. The RCN is aimed to bring together infrastructure scholars and stakeholders in 2024-2025.
- Proposed session for the ASSW (Arctic Science Summit Week) 2025 in Boulder, Colorado: “Collaborative Infrastructures: Prioritizing community goals in infrastructure planning, development and maintenance”.
- CAP portal outreach to raise awareness and use of this NNA-CO resource.
